### **Amkai announces the successful implementation of Datascope's Passport 2**

***The integration of Datascope's Passport 2 patient monitoring device is a major advance for users of AmkaiCharts™ allowing Amkai's clients to get closer to true paperless operations***

**Waterbury, CT --- January 14, 2009 ---** Amkai announced today that it has successfully integrated Datascope's Passport 2 patient monitoring device with AmkaiCharts™, Amkai's clinical health record (EMR) for ambulatory surgery centers, surgical hospitals, and affiliated practices.

The Passport 2 makes monitoring simple. Rather than rummaging through layers of menus, there's a Navigator™ knob. For frequently used functions, there are quick-action keys. Three waveforms will automatically reconfigure to six when needed. Colorful numerics automatically re-adjust to maximum size for optimal display visibility. Here is a summary of the Datascope provides:

- Dedicated function keys provide one-touch access to all vital functions
- Colorful waveforms with automatic display configuration simplify use and enhance display visibility
- Standard features include six waveforms, auto-adjustable large numerics, 3 or 5-lead ECG, lead-selectable respiration, non-invasive blood pressure, temperature, and motion tolerant SpO<sub>2</sub>
- ECG analysis module offers diagnostic quality 12-lead ECG interpretation with ST and arrhythmia analysis in a compact, easy-to-use module
- complete 5-agent auto-ID, CO<sub>2</sub>, O<sub>2</sub> and N<sub>2</sub>O analysis for comprehensive and reliable gas monitoring

"The days of the stand alone monitoring device are counted", said Peter Sereny, M.D., Amkai's Medical Director. "By integrating the Datascope patient monitoring device with AmkaiCharts, efficiency is significantly enhanced, while error is all but eliminated", he added.

AmkaiCharts automatically records the data from the Datascope into the relevant section of the patient's record in AmkaiCharts. "Amkai is always looking for ways to enhance the user experiency, improve efficiency, reduce errors, and improve patient safety", said Thomas Pinelli, VP and Product Manager for Clinical Systems at Amkai.

## **About Amkai**

Amkai delivers comprehensive information management for outpatient surgery providers across every stage of administrative and clinical workflow. Amkai's suite of business management, electronic medical record, CPOE, e-prescription, and related applications promotes streamlined operations, structured data exchange, and patient safety. For further information, visit [www.amkai.com](http://www.amkai.com) or call 866.265-2434.

## **About Datascope**

Datascope Patient Monitoring is a company founded on innovation, accompanied by an enduring commitment to customer service and an unwavering dedication to improving patient care. Through the products it manufactures and the service it delivers, Datascope Patient Monitoring is committed to bettering the patient experience.
